[DRAFT DO QAPP Addendum cleanToRob 7-24-12 EPA Comments.docx](#)
[ATTQKHDO.pdf](#)

Hi Rob,

Attached are our comments on the DO QAPP. In the interest of time, I'm just sending you a redline/strikeout version of the document you sent us.

In addition, we are recommending that the following 3 additional locations be monitored, all in relatively low-TOC areas. These locations correspond to a figure we pulled from the 2009/2010 sediment data report (figure attached), and are based on a review of TOC results from the 2009/2010 sediment sampling effort.

Estuarine zone - LPRT03B (RM 2.1) – TOC 1.8%

Freshwater zone --

- LPRT09G (RM 8.89) – TOC 0.32%
- LPRT15F (RM 14.79) – TOC 0.2%

Please let me know if you have any questions.

Thanks,
Stephanie
